

ERP Solutions - SAP

Yash is Savitr's preferred Partner in providing ERP solutions. Both compliment each others capabilities in delivering value to customers. GCS is a division of Yash.

Business Applications

GCS's Business Application Services are designed to assist organizations implement and maintain the leading financial, HR, supply chain, and manufacturing software solution in the marketplace - SAP. Our professionals help select, integrate, and optimize SAP applications that run mission-critical operations.

Limited IT Resources

In today's business world of shrinking staffs and budgets, IT management is often about strategically allocating limited resources and improving efficiency so that you can do more with less. GCS takes a best practices approach that has proven effectiveness at optimizing IT organizations and their SAP solution to meet key organization metrics.

Our Best Practices approach allows us to utilize an extensive repository of tools that can integrate your SAP solution with your mission critical business functions. These SAP specific tools include implementation and configuration guides, process flows, and fit / gap requirement matrices.

GCS uses a blended off-shore delivery model that is unique in the industry. This model utilizes our Global Development Center where highly qualified developers from off-shore, as well as domestically, work together with our business application experts at your location to deliver lower cost, real-time ERP best practice solutions to your organization.

Our business consultants will work with you and your team to

- Identify key business drivers
- Recommend the tools that are required to Configure best practices for your SAP solution
- Conduct process assessments for critical business functions
- Configure your SAP solution for optimal performance

Professional Services

GCS knows SAP. As the single focus of GCS, we know the workings of the SAP products and how to make the SAP products work for you. GCS, established in 1991 and an SAP partner since 1996, has created a wide range of service products focused on SAP and designed to provide quality solutions at a cost effective price. With GCS you get the expertise necessary to create and run successful projects that deliver on time results and within budget. We work with you to deploy the latest SAP technologies and product innovations by leveraging the combined experiences of your staff and our team resulting in high levels of knowledge transfer and a self sufficient customer.
